Oklahoma Science Adventure 2016

What is Oklahoma Science Adventure?
Are you ready to explore Oklahoma forests, streams, ponds, and fields in search of frogs, fish, insects, and fossils? What is science? What does a field scientist do? Join us as we answer these questions during this one-week science field experience.

14 students from across Oklahoma will be selected based on the criteria below. We will spend most of our time outdoors, working with scientists on field research projects. After excavating fossils and catching pond animals, we will also take night hikes, go canoeing and build leadership and teamwork skills. The week will conclude with an overnight stay at the Sam Noble Museum where we will further study the fossils and specimens that we encountered in the field. Throughout the program we will document our experiences through written and digital journals, giving you an opportunity to use a variety of technologies to share your experiences and research projects.

2016 Program Dates
Sunday, July 10, 2016 – Saturday, July 16, 2016

Eligibility
- Oklahoma resident student currently enrolled in grades 6, 7 or 8.

Selection Criteria
